

ABSTRACT

Novel dibenzoylmethane-based compounds, use as photoactivatable sunscreens and cosmetic compositions containing them

The present invention relates to dibenzoylmethane-based compounds of formula I,

and also to salts or solvates thereof, and to the process for preparing them.

The invention also relates to the use of a compound of formula (I) as an agent for protecting the skin or the hair against UV radiation and to a cosmetic and/or dermatological product, characterized in that it comprises a compound of formula (I) as active principle.
